### PROFILE

Full-Stack Developer with a background in Web Application Development and experience building digital products end-to-end: interface, API, database and deployment. I have worked in a professional environment resolving real frontend, backend and data-model tickets with Angular and Spring Boot, and complement that experience with personal projects in React and Node.js taken to production. I learn quickly, adapt to new technologies, and aim to add value from day one.

### EXPERIENCE

#### Software Development Internship — Vitaly February 2026 – April 2026

*Angular, Spring Boot, Databases*

- Gained intensive training in Angular, building a solid foundation in enterprise frontend development before joining an active team with a production application.
- Contributed to frontend development with Angular: components, services, routing and enterprise frontend best practices.
- Focused on backend development with Spring Boot and databases, designing APIs, persistence and data modeling.
- Developed integrated solutions as part of a team, resolving real frontend, backend and database tickets on an existing product.
- Worked autonomously on the final application presentation, demonstrating the ability to deliver a complete project.

### PROJECTS

#### Regnum Hollow — Final Degree Project

*React, TypeScript, Node.js, MongoDB, Tailwind CSS*

- Turn-based strategy game with tactical combat, AI and client-server architecture, developed as a final degree project.
- Demonstrates full-stack proficiency in React, Node.js and MongoDB on a complex, deployed product.

#### PokéBinder — Personal project

*React, Node.js, MongoDB, REST API, Tailwind CSS*

- Full-stack platform for Pokémon TCG collectors: catalog, MongoDB-based album, wishlist and collection statistics.
- Includes market prices and a video game guide with Pokédex and team building.

### EDUCATION

#### Higher Vocational Training in Web Application Development (DAW) — IES Valle del Jerte, Plasencia, Cáceres 2024 – 2026

- Interface design, client- and server-side programming, relational databases, application deployment and agile methodologies.
- High School Diploma (Bachillerato) — IES Valle del Jerte

### SKILLS

#### HARD SKILLS

- Languages: TypeScript, JavaScript, Java, PHP, SQL, HTML, CSS
- Frontend: React, Angular, Tailwind CSS, Bootstrap, Vite
- Backend: Node.js, Express, Spring Boot, REST APIs, Java EE
- Data: MongoDB, MySQL
- Tools: Git, GitHub, Vercel, VS Code

#### SOFT SKILLS

- Teamwork
- Fast learner
- Problem-solving
- Organization
- Clear communication

### LANGUAGES

**Spanish:** Native    **English:** Intermediate level
